CAREER OBJECTIVE

As a passionate and detail-oriented Computer Science graduate with hands-on experience in full-stack web development using the MERN stack, I am seeking a challenging role in a dynamic organization where I can apply my technical skills, contribute to innovative projects, and continuously grow as a developer. I aim to build scalable, user-centric applications while learning from real-world challenges and experienced professionals.

EDUCATION

B.E. – Computer Science & Engineering | 2025

Shree Devi Institute of Technology, Mangalore | 8.46 cgpa

II PU – PCMB | 2021

Chakravarthy PU College, Kadur | 81.66%

INTERNSHIPS

- Varcons Technologies pvt. ltd, Bangalore – Full Stack Web Development Intern (May 2023 – June 2023).

PROJECTS

Tour's and Travel Management System - PHP, MySQL

- Created a user-friendly admin page within the tour and travel management system and designed a responsive web page using HTML, CSS, JavaScript.
- It's a digital solution that modernizes how tour and travels operate.

Health and Wellness Dashboard Project

- Health and Wellness Dashboard focused on enhancing productivity and mental well-being through an intuitive, user-friendly interface.
- It includes personalized greetings with weather updates, a hydration tracker, and a Pomodoro timer for focus.
- Users can log their moods using emojis and receive scroll-based health tips for daily wellness. A smart “Lite Mode” ensures smooth performance during offline or low-network conditions.

Predictive Model for Post-Operative Complications in Cardiac Surgery

- Predicts post-operative complications in cardiac surgery patients using machine learning.
- Assists doctors with early risk detection and personalized care decisions.
- Aims to reduce patient recovery time and hospital workload.
